**Delays caused by railroad maintenance.** Besides the unexpected delays, passengers may also experience delays caused by railroad construction and maintenance projects. Every effort is made to schedule this work during off-peak and weekends to keep the impact of delays to a minimum. We also post service bulletins in the stations and on our web site in advance of anticipated delays.

In April there were no trains delayed in excess of 59 minutes. NICTD is experiencing an increase in operational delays as rail cars are entering into revenue service with the new Positive Train Control system. This is expected with any new technology. NICTD is working through remediating the issues as quickly as possible.
